Ultra-Bond Plus Try-In Paste is a non-setting resin based paste which allows you to preview shades before cementation of porcelain veneers. The Try-In Paste simulation allows you to see what the veneers will look like once bonded in place with Ultra-Bond Plus, fully cured.
Caution: Wear eye protection while using this product.

Caution: Wear protective gloves while using this product.

Caution: Ultradent products contain methacrylate monomers which have been shown to cause allergic reaction in individuals sensitive to these ingredients.

Caution: Ultradent has not been studied in children, pregnant or breastfeeding women.

**Try-In**

1. Preparation of Lumineers®
   a. After the patient is seated, treat the Lumineers with Porcelain Conditioner for 30 seconds, rinse and dry well.
   b. Apply Cerinate Prime® with a disposable brush to the Lumineers for 30 seconds and blow dry. (DO NOT use cotton pellet or sponge.)
   c. Place Lumineers into the case box in their proper slots.
   d. Close the lid on case box to shield from light.

2. Preparation of Tooth Surfaces
   a. Clean the teeth with a story of Porcelain Polishing Paste.
   b. Etch teeth for 20 seconds with Etch ‘N Seal® rinse and dry.
   c. Mix together equal amounts of Tenure® A and B. Apply 3-5 coats (or until glossy) to each tooth, then air-dry the tooth surfaces.

3. Try-In of Lumineers
   a. Syringe the Ultra-Bond® Plus Try-In Paste into each of the Lumineers.
   b. If the shade is not what you or the patient wants, remove the Try-In Paste from the Lumineers and tooth surface with a Sable® or a clean, dry brush. Reapply a new shade of Try-In Paste and check the shade again.
   c. Gently thin the Tenure S with an art film and be left on both the tooth and porcelain surfaces.
   d. Place Lumineers into the case box in their proper slots.
   e. Close the lid on case box to shield from light.

4. Preparation of Tooth Surfaces
   a. Apply Tenure MPB System Kit.
   b. Etch teeth for 20 seconds with Etch ‘N Seal® rinse and dry.
   c. Mix together equal amounts of Tenure® A and B. Apply 3-5 coats (or until glossy) to each tooth, then air-dry the tooth surfaces.

5. Try-In of Lumineers
   a. Syringe the Ultradent® Plus Try-In Paste into each of the Lumineers.
   b. If the shade is not what you or the patient wants, remove the Try-In Paste from the Lumineers and tooth surface with a Sable® or a clean, dry brush. Reapply a new shade of Try-In Paste and check the shade again.
   c. Gently thin the Tenure S with an art film, then air film will be left on both the tooth and porcelain surfaces.
   d. Place Lumineers into the case box in their proper slots.
   e. Close the lid on case box to shield from light.

6. Preparation of Tooth Surfaces
   a. Apply a Schure 349 instrument or cotton pliers and gently tease the Lumineers off the tooth surfaces.
   b. Remove the Try-In Paste from the Lumineers and tooth surfaces with a clean, dry brush. DO NOT USE Tenure S. Only use Tenure S to clean up excess once final Try-In Paste has been selected.
   c. Gently thin the Tenure S with an art film if needed to reapply Porcelain Conditioner or Cerinate Prime if you are cementing directly after try-in. For application of Lumineers, see the Ultra-Bond Plus cement kit instructions.

**Storage**

Do not expose to temperatures exceeding 75º F (24º C).

Do not freeze.
