INSTRUCTIONS

Gloss-N-Seal® is a light-cure, low-viscosity surface sealant with exceptional abrasion resistance. It cures in a very thin, glazed layer with a minimal oxygen-inhibited layer. Gloss-N-Seal penetrates and seals, thus reducing composite wear, marginal staining, and breakdown. Applications include sealing composite restorations, coating provisional for instant glazed finish, and resurfacing old composite restorations.

CAUTION: Wear protective gloves while using this product.

CAUTION: Wear eye protection while using this product.

INSTRUCTIONS

Gloss-N-Seal® has not been studied in children, pregnant or breast-feeding women.

1. Following occlusal adjustment, rinse and air-dry the surface (tooth as well as composite).
2. For maximum bond strength apply one layer of Tenure Uni-Bond to the entire restoration/tooth surface, and gently air thin.
3. Apply one thin coat of Gloss-N-Seal®, and light-cure for the final seal and finish, starting with:
   - With Saphire PAC lights (all models) start with 5 second exposures.
   - With Flashlite LED lights (all models) start with 10 second exposures.
   - For all other curing lights; halogen, LED and other refer to the manufacturer instructions. A minimum of 10-30 seconds is recommended.

STORAGE

Do not expose to temperatures exceeding 77°F (25°C). Do not expose to direct sunlight. Cold storage is recommended in tropical climates. Recommended temperature when used is 70°F-75°F (21°C-24°C).
