LIMITED WARRANTY

DenMat will replace, or refund the purchase price of any of its products that are proven to be defective within 30 days of the purchase date. Replacement of defective goods, or refund of the purchase price shall be the exclusive remedy for the user. DenMat will not be liable for any economic, incidental, or consequential loss or damage that arises out of the use of, or the inability to use its products.

This limited warranty is in lieu of all other warranties, expressed or implied, and shall be void if the product is improperly stored or used. There are no implied warranties of merchantability, fitness for a particular purpose, or otherwise. Before using this product, the user shall determine whether it is suitable for the intended use and the user shall assume all risk and liability associated therewith.

**CAUTION:** This product has not been tested in children, pregnant or breast-feeding women.

### DIRECTIONS

**Instructions for Root/Dentin Desensitization**

1. Clean the sensitive area with Porcelain Polishing Paste.
2. Rinse with warm water and blot dry with a cotton pellet.
3. Apply multiple coats (4-6) of Tenure Quik with Fluoride to the surface. Air-dry with a syringe for several seconds to remove the solvent. (Fig. 1)
4. Remove the solvent from the Tenure Quik with Fluoride by directing a gentle stream of dry, oil-free air from the air syringe. The force of the air should be strong enough to extract the adhesive's solvent, but not so forceful as to push the adhesive from the preparation. (Fig. 2)
5. Light cure Tenure Quik with Fluoride (Fig. 3), starting with:
   - Sapphire PAC lights (all models) start with 5 second exposures.
   - Flashlite LED lights (all models) start with 5 second exposures.
   - Flashlite LED lights (all models) start with 10 second exposures.
   - For all other curing lights, halogen, LED and other refer to the manufacturer instructions. A minimum of 10-30 seconds is recommended.

### STORAGE

- Do not freeze.
- Do not refrigerate.
- Do not expose to temperatures exceeding 77°F (25°C).
- Do not expose to direct sunlight.

Recommended temperature when used is 70°–75°F (21°–24°C).

Cool storage is recommended in tropical climates. Bring to room temperature prior to use.
