LIMITED WARRANTY
DenMat will replace, or refund the purchase price, of any of its products that are proven to be defective within 30 days of the purchase date. Replacement of defective goods, or refund of the purchase price, shall be the exclusive remedy for the user. DenMat will not be liable for any economic, incidental, or consequential loss or damage that arises out of the use of, or the inability to use, its products. This limited warranty is in lieu of all other warranties, expressed or implied, and shall be void if the product is improperly stored or used. There are no implied warranties of merchantability, fitness for a particular purpose, or otherwise. Before using this product, the user shall determine whether it is suitable for the intended use and the user shall assume all risk and liability associated therewith.

The CeriSaw is a hand-held, interproximal saw specially designed to remove excess composite in the contact areas, using one or both hands. The CeriSaw is available in two sizes: anterior (regular size) for anterior interproximal surfaces and posterior (small size) for posterior interproximal surfaces. The saw is available in kits with 7 blade and 11 blades. Replacement blade packages contain ten blades. The serrated edge of the CeriSaw blade is approximately .02 mm thick.

**CAUTION**
The CeriSaw uses high quality surgical blades. Extreme care should be taken when using these sharp instruments to avoid injuring the interproximal papilla. Create a safety stop by gently placing an interproximal wedge to help prevent accidentally cutting the papilla.

**DIRECTIONS**
1. Completely cure the composite restorative.
2. Thoroughly remove excess composite from the interproximal regions.
3. Place the CeriSaw next to the incisal edge at the interproximal area where excess composite is to be removed.
