Virtuoso® Sealant can be used both as an enamel sealant or composite margin sealant.

CAUTION: Wear protective gloves while using this product.

Virtuoso® Sealant has not been tested in children, pregnant or breastfeeding women.

**DIRECTIONS**

**For Enamel Surface (Pit and Fissure Sealant)**
1. Perform a quick prophy.
2. Apply Etch 'N' Seal® to the enamel surfaces for 10 to 15 seconds. Rinse and dry.
3. Apply Virtuoso Sealant to the surface. Tenure® Dab Can be used to adapt the Virtuoso Sealant to all of the occlusal surfaces.
4. Light cure Virtuoso Sealant.
5. If necessary, check the bite, then perform minimal finishing and polishing.

To Refresh Old Composite Surfaces
1. Use a fine diamond to remove the surface of the old composite to expose a new layer.
2. Apply Etch 'N' Seal® to the composite surface (extend it out to cover approximately 2 mm of the enamel adjacent to the restoration margin) for 10 to 20 seconds. Rinse and dry.
3. Apply Virtuoso Sealant to composite surfaces and marginal area. Light cure.
4. If necessary, check the bite then perform minimal finishing and polishing.

Due to variations in the performance characteristics of light curing units ALWAYS bench test restorative materials before use in vivo.

- Curing lights with power density greater than 800 mW/cm². Cure the buccal and lingual for 20 second exposures for each area.
- Curing lights with power density less than 800 mW/cm². Cure the buccal and lingual for 10 second exposures for each area.
- Curing lights with power density less than 300 mW/cm² should not be used to care.

**STORAGE**

Do not expose to temperatures exceeding 77°F (25°C). Do not expose to direct sunlight. Do not freeze. Cold storage is not required.
